

Veeam Data Platform 13 Recommended Maximums

This document outlines recommended and consistently regression tested maximums for Veeam Backup & Replication product configuration. These guidelines are designed to help with deployment planning and ensure optimal performance and stability.

While these are not hard limits and many existing Veeam deployments already go well beyond these numbers, exceeding these recommendations significantly may lead to decreased efficiency or potential performance issues.

- [Veeam Backup & Replication Server](#)
- [Veeam ONE](#)
- [Veeam Cloud Connect](#)
- [Veeam Enterprise Manager](#)

Veeam Backup & Replication Server

Virtual Machines

- 20000 VMs per Veeam Backup & Replication server
- 5000 VMs per backup or backup copy job
- 1000 parallel backup tasks
- 750 simultaneously running backup or backup copy jobs
- 1000 parallel VMware Instant Recovery or Full VM Recovery sessions per Veeam Backup & Replication server
- 200 parallel VMware Instant Recovery sessions per vPowerNFS server

Veeam Agents

- 10000 Veeam Agents per Veeam Backup & Replication server
- 1000 Veeam Agents per protection group
- 1000 Veeam Agents per backup or backup copy job
- 500 parallel backup tasks
- 500 parallel backup copy tasks

Application Plug-ins

Veeam Plug-in for Microsoft SQL Server

- 5000 databases per Microsoft SQL server
- 1000 database servers and 25000 databases per Veeam Backup & Replication server

Veeam Plug-ins for Oracle RMAN, SAP HANA, SAP MaxDB, SAP on Oracle and IBM Db2

- 1000 database servers and 5000 databases per Veeam Backup & Replication server

Unstructured Data

- 100 simultaneously running backup or backup copy jobs
- 20 billion files per backup job

File to Tape Backup

- 2 billion source files and 20 billion file versions per Veeam Backup & Replication server

Veeam CDP

- 2000 VMs (up to 8000 VM disks) protected by CDP jobs
- 400 simultaneously running CDP jobs

Scale-out Backup Repository

- 24 Performance Extents

Veeam ONE

- Veeam Backup and Replication: 100 servers with up to 60,000 total protected workloads
- VMware Environment Monitoring and Reporting: up to 20,000 Virtual Machines
- Hyper-v Environment Monitoring and Reporting: up to 10,000 Virtual Machines

Veeam Cloud Connect

- 1000 concurrent tasks per Cloud Connect server
- 1000 tenants per Cloud Connect server
- 500 concurrent tasks per Cloud Gateway

Veeam Enterprise Manager

- Backup servers: 100 Veeam Backup & Replication servers
